

EXP NO: 8

230701229

AIM:

The aim is to create storyboards representing the user flow for a mobile app, such as a food delivery app, using Balsamiq.

PROCEDURE:

STEP 1: DEFINE THE USER FLOW

IDENTIFY KEY SCREENS

1) STARTING PAGE:

A start page (also called a splash screen or welcome screen) is the very first screen a user sees when they open an app. It sets the tone for the app (Pizza Hut).

2) LOGIN SCREEN:

A login screen is a user interface screen in an app or website where users enter their credentials (like email/username and password) to access their account.

3) HOME SCREEN:

This home screen contains the top-categories pizzas one by one and it also Has their costs too.

The top navigation is given as search bar (for searching pizzas).

4) PAYMENT SCREEN:

A payment screen in an app or website is the interface where users can input their payment details to complete a transaction.

It also includes payments methods.

5) CONFIRMATION SCREEN:

A confirmation screen after payment is the page or interface that users see once their transaction has been successfully processed.

It has Summary and Transaction details.

6) SUCCESS SCREEN:

A **success screen** is a confirmation page that displays after a user successfully completes a specific action, such as making a payment, submitting a form, or finishing a process.

It has positive statement like “Payment Successful”.

MAP THE USER’S JOURNEY:

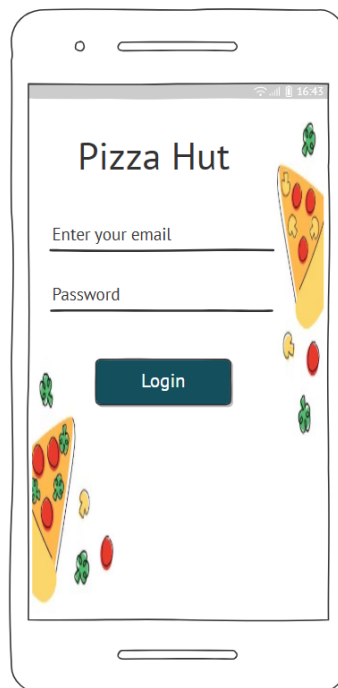

START SCREEN -> LOGIN SCREEN -> HOME SCREEN -> PAYMENT SCREEN -> CONFIRMATION SCREEN ->SUCCESS SCREEN.

STEP 2: Create Storyboards Using Balsamiq

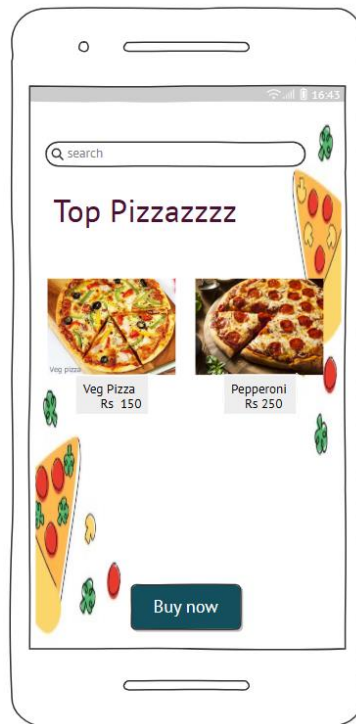

- 1) User sees app logo and a “Get Started” button on a clean welcome screen. Tapping the button moves to the Login Screen.

- 2) User enters email and password to log in. Successful login leads to the Home Screen; errors show inline messages.

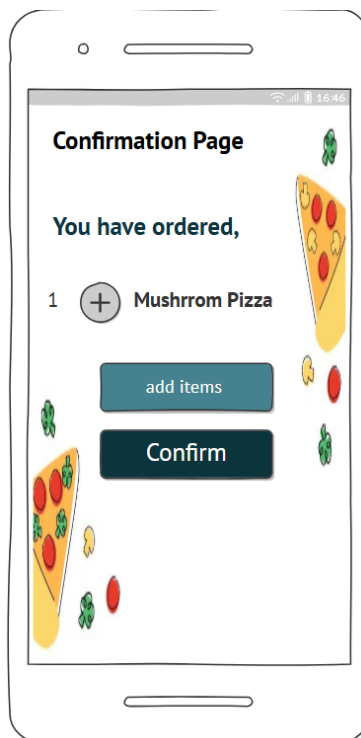

- 3) Dashboard shows main features or top categories and a “Make Payment” button. User taps the button to initiate a transaction.

- 4) User enters payment amount and method, then fills in payment details.
Tapping "Proceed to Pay" validates inputs and moves to Confirmation Screen.

- 5) User reviews payment summary and confirms the transaction.
Tapping “Confirm” sends the payment and proceeds to Success Screen.

- 6) Shows a “Payment Successful” message. User taps “Go to Home” to return to the main dashboard.
