

EXP NO: 6

230701229

Aim:

The aim is to demonstrate the lifecycle stages of UI design via the RAD model and develop a small interactive interface employing Axure RP.

Procedure:

Step 1: Requirements Planning:

Step 2: User Design

Step 3: Construction

Step 4: Cutover

1) Requirements Planning:

In the requirements planning stage, identify the basic features for an healthcare delivery,

Key Features:

- 1) User authentication (login via email/phone)
- 2) Search and browse medicines
- 3) Medicine details with pricing and quantity
- 4) Add to cart and order medicines
- 5) Navigation between home, orders, lab tests, and user profile

2) User Design:

a) **Login Screen**

- Fields: Email/Phone and Password
- Action Button: "LOGIN"
- Branding at the top: "Health Easy"

b) Home Screen

- Search bar for medicines or lab services
- Two options: “Medicines” and “Lab Tests”
- Bottom navigation bar with icons: Home, Orders, Medical Kit, Profile

c) Medicine List Screen

- Title: "Order Medicines"
- Grid view of available medicine images
- Each image likely leads to a detailed screen

d) Medicine Details Screen

- Displays selected medicine info:
 - Name, dosage, price per tablet, and total cost
- Scrollable description box
- Action: "Add to Cart"
- Button: “ORDER NOW”
- Presumably shows items in cart before confirming purchase.

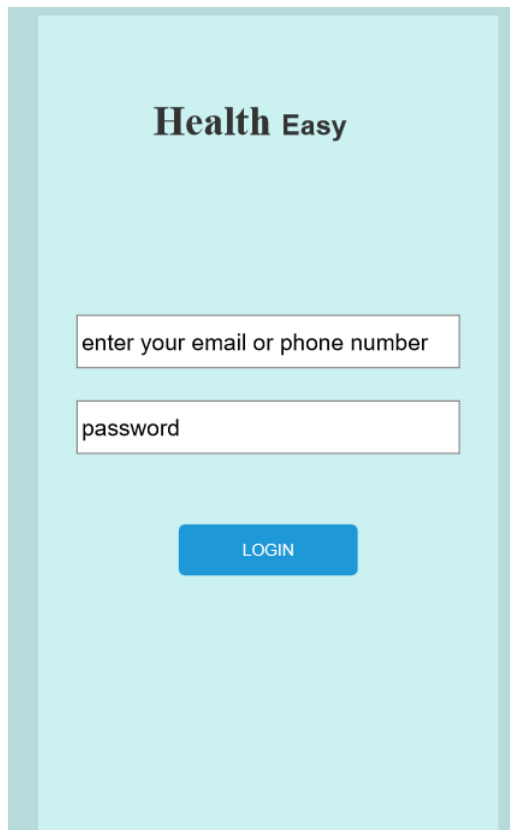

3) Construction:

Tools Used: Axure XP (for interactive wireframes and UI prototyping)

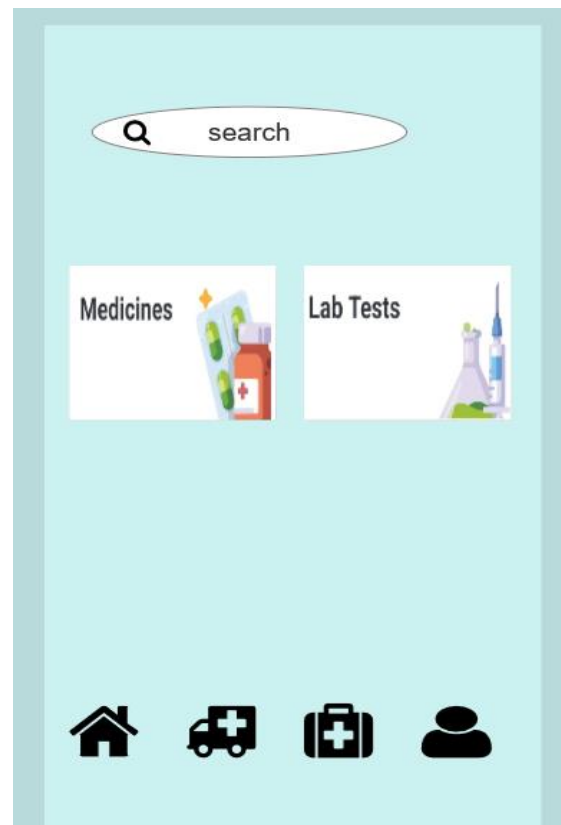

- UI designs created for login, home, medicine listing, and medicine detail screens
- Basic navigation flow between screens established
- Visual representation of key features (search, cart, order, profile)

4) Cutover:

- Presenting the prototype to stakeholders, mentors, or target users
- Gathering feedback on usability, design clarity, and feature completeness
- Refining UI elements and screen flows based on collected input

1) Login Page

2) Order Page

3) Medicine Details Page

4)Order Details Page
