

EXP NO: 9

230701229

AIM: The aim is to design input forms that validate data, such as email and phone number, and display error messages using HTML/CSS and JavaScript with Validator.js.

PROCEDURE:

- 1) Setting Up the HTML Form
- 2) Styling the Form with CSS
- 3) Adding JavaScript for Validation

1) SETTING UP THE HTML FORM

```
index.html X  Extension: Node JSON Autocomplete  JS script.js

index.html > html > head > style > canvas
1  <!DOCTYPE html>
2  <html lang="en">
3  <head>
4      <meta charset="UTF-8" />
5      <meta name="viewport" content="width=device-width, initial-scale=1.0"/>
6      <title>Inventory Management Visualization</title>
7      <style>
8          body {
9              font-family: Arial, sans-serif;
10             text-align: center;
11             margin: 50px;
12         }
13         canvas {
14             margin: 20px auto;
15         }
16     </style>
17 </head>
18 <body>
19     <h1>Inventory Management System</h1>
20     <canvas id="pieChart" width="400" height="400"></canvas>
21     <canvas id="barChart" width="400" height="400"></canvas>
22
23     <!-- Chart.js CDN -->
24     <script src="https://cdn.jsdelivr.net/npm/chart.js"></script>
25     <!-- External JavaScript file -->
26     <script src="script.js"></script>
27 </body>
28 </html>
29
```

2) STYLING CSS

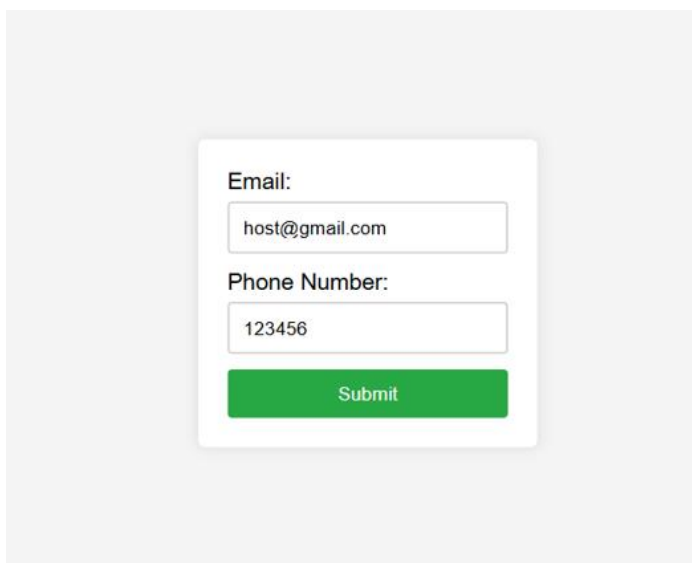

```
Welcome  index.html  # style.css  JS script.js

# style.css > ...
1  /* style.css */
2  body {
3      font-family: Arial, sans-serif;
4      background-color: #f4f4f4;
5      display: flex;
6      justify-content: center;
7      align-items: center;
8      height: 100vh;
9      margin: 0;
10 }
11
12 .container {
13     background-color: white;
14     padding: 20px;
15     border-radius: 5px;
16     box-shadow: 0 0 10px rgba(0, 0, 0, 0.1);
17 }
18
19 form {
20     display: flex;
21     flex-direction: column;
22 }
23
24 label {
25     margin-bottom: 5px;
26 }
27
28 input {
29     margin-bottom: 10px;
30     padding: 10px;
31     border: 1px solid #ccc;
32     border-radius: 3px;
33 }
34
35 button {
36     padding: 10px;
37     background-color: #28a745;
38
39     padding: 10px;
40     border: 1px solid #ccc;
41     border-radius: 3px;
42 }
43
44 button {
45     padding: 10px;
46     background-color: #28a745;
47     color: white;
48     border: none;
49     border-radius: 3px;
50     cursor: pointer;
51 }
52
53 button:hover {
54     background-color: #218838;
55 }
56
57 .error {
58     color: red;
59     font-size: 0.875em;
60 }
61
62
```

3) Adding JavaScript for Validation

```
JS script.js > ...
1 // script.js
2 document.getElementById('myForm').addEventListener('submit', function (e) {
3     e.preventDefault();
4
5     const email = document.getElementById('email').value;
6     const phone = document.getElementById('phone').value;
7
8     const emailError = document.getElementById('emailError');
9     const phoneError = document.getElementById('phoneError');
10
11     // Clear previous error messages
12     emailError.textContent = '';
13     phoneError.textContent = '';
14
15     // Validate email
16     if (!validator.isEmail(email)) {
17         emailError.textContent = 'Please enter a valid email address.';
18     }
19
20     // Validate phone number
21     if (!validator.isMobilePhone(phone, 'any')) {
22         phoneError.textContent = 'Please enter a valid phone number.';
23     }
24
25     // If valid, log the data (could be replaced with actual form submission)
26     if (validator.isEmail(email) && validator.isMobilePhone(phone, 'any')) {
27         console.log('Email:', email);
28         console.log('Phone:', phone);
29     }
30 });
31
```

4) OUTPUT VALIDATION:

Email:

Phone Number:

Submit
